Sponsorship Tiers & Stewardship

Next page

■ Stewardship Principles

Sponsorship of Index Group platforms is **an act of stewardship** - supporting institutional infrastructure that **benefits Botswana's entire corporate ecosystem**. Index Group sponsors do not buy rankings. They support the operational infrastructure that enables credible recognition: evaluation systems, advisory coordination, data validation, archival maintenance, and platform development.

Sponsorship aligns your organization with governance standards and long-term institutional thinking. It signals a commitment to raising corporate excellence benchmarks across Botswana.

Institutional Infrastructure & Ecosystem Growth

Sponsorship Tiers

The Tier Ladder

Accredited & Recognized by Leading Institutions

■ No influence over Rankings

Sponsorship does not influence evaluation outcomes.

Organizations that sponsor Index Group are evaluated using the same methodology and standards as non-sponsors. This firewall is enforced through independent advisory oversight, conflict-of-interest declarations, and removal clauses.

Sponsors support the platform, not their own rankings.

**Standardized Protocol Fairness System (SPFS)
Governance Firewall Enforcement Protocol (GFEP)**

■ Partnership Opportunities

Transparency is balanced with discretion to protect competitive intelligence while serving the public interest.

- **Strategic Collaborations:** Partner on sector-specific indices or technical corporate governance research.
- **Advisory Nominations:** Propose experts for thematic advisory panels (subject to independent vetting).
- **Institutional Alignments:** Align your CSR or Governance mission with a national-scale benchmarking platform
